Bosch Introduces Two New Greenstar Boiler Models with New Venting Options

- New Condensing Models: Greenstar Combi 131 & Greenstar 79
- Wall-Mounted for Space Savings and Fast Service/Maintenance
- Concentric Up and Out Venting plus Polypropylene Twin Pipe
- Greenstar Product Line Features 95% AFUE for 5 Space Heating Boilers and 3 Combi Models

Londonderry, NH – Bosch Thermotechnology has introduced two new gas condensing Greenstar models for residential applications with AFUE rating of 95%: the Greenstar Combi 131 for space heating and hot water at up to 3.2 GPM and the Greenstar 79 for space heating.

Both wall-mounted units are available with new venting options from Bosch: concentric up and out venting and polypropylene twin pipe for installation flexibility. The up and out venting option kit consists of an appliance adaptor, a 90° elbow and a telescopic termination that accommodates varying wall thicknesses.

Greenstar wall-mounted boilers feature ultra-efficient condensing technology. With a hydronic manifold and three-speed integral pump, they can be installed more quickly.

With the addition of these two models Bosch Thermotechnology's Greenstar boiler family consists of five regular space heating boilers and three combi units under 155 MBH for residential applications. All Greenstar products come with a limited lifetime heat exchanger warranty and a limited 5-year parts and labor warranty (see www.boschheatingandcooling.com for complete warranty details). Greenstar 131 Combi model is available in September; 79 boiler model will be available later this year.

For more information and specification data on the new models and the entire Greenstar family, visit www.boschheatingandcooling.com/Greenstar.

About Bosch

About Bosch Thermotechnology

Bosch Thermotechnology is a leading source of high quality water heating and comfort heating systems. The Company offers Bosch tankless, point-of-use and heat pump electric water heaters, Bosch solar thermal systems, Buderus floor-standing and wall-hung boilers, Bosch and FHP geothermal systems as well as controls and accessories for every product line.

Bosch Thermotechnology is committed to reinventing energy efficiency by offering smart products that work together as integrated systems that enhance quality of life in an ultra-efficient and environmentally friendly manner. For more information, visit www.boschheatingandcooling.com

About The Bosch Group

The Bosch Group is a leading global supplier of technology and services, active in the fields of automotive technology, energy and building technology, industrial technology, and consumer goods. According to preliminary figures, more than 306,000 associates generated sales of 52.3 billion euros (\$67.2 billion) in 2012. The Bosch Group comprises Robert Bosch GmbH and its more than 350 subsidiaries and regional companies in some 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Bosch spent some 4.5 billion euros (\$5.8 billion) for research and development in 2012, and applied for over 4,700 patents worldwide.

The Bosch Group's products and services are designed to fascinate, and to improve the quality of life by providing solutions that are both innovative and beneficial. In this way, the company offers technology worldwide that is "Invented for life." Additional information is available online at www.bosch.com and www.bosch-press.com.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, securi-

ty and communication systems, packaging technology, thermotechnology, household appliances, solar energy, healthcare telemedicine and software solutions. Having established a regional presence in 1906, Bosch employs over 22,500 associates in more than 100 locations, with sales of \$9.8 billion in fiscal year 2011.
