## **Bosch Tronic 5000 Tankless Water Heaters Provides Whole House Comfort**

- Tronic 5000 Tankless Water Heaters are Electric
- New WH36 Model Provides 5 Gallons of Hot Water a Minute
- 97% Efficient with Minimal Stand-by Loss
- Endless Hot Water for Up to Two Major Applications at a Time
- Compact and Lightweight Wall-Mounted Units

**AHR Expo, New York City** – Bosch Thermotechnology has introduced a new higher kW unit – the WH36 - to its family of Tronic electric tankless hot water heaters. The Tronic 5000 WH36 comes with an efficiency rating of 97% and can provide endless hot water for up to two major applications at a time. Like all Tronic 5000 models it can be installed virtually anywhere inside a home to provide whole house hot water on demand – for the WH36 at 5 gallons per minute.

Compact and lightweight Tronic 5000 models – WH17, WH27 and WH36 – can be used in smaller homes and specific home conversion applications with hard to reach locations requiring extra hot water: in-law suites, garage apartments, pool houses and office suites with an attached bathroom/shower. They can also be used to provide supplemental hot water for high-flow fixtures.

Tronic 5000 models conserve energy by experiencing minimal stand-by loss and have modulating elements that ensure a constant output temperature for hot water comfort. They come with a filter screen on the units' inlet and provide enhanced scale resistance buildup over time.

Tronic 5000 models require hard wiring through double-pole breakers in the breaker box and require varying amperage service (WH17 80 amps –WH27 120 amps – WH36 180 amps). (Note: For Canadian amperage requirements, consult the Tronic 5000 product literature.)

For more information and specification data on the new models and the
