

Technical Service Bulletin:

# Internal Domestic Hot Water Filter

Models: Bosch Greenstar Combi

**BOSCH**

---

## Internal DHW filter information

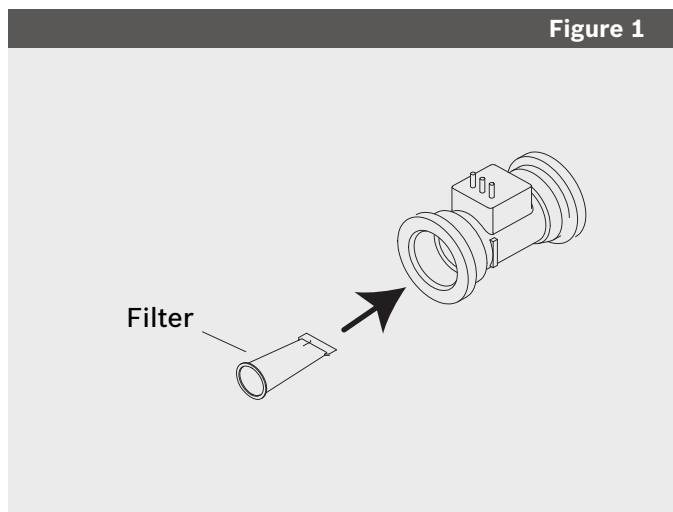

- ▶ Part number: 8716-106-486

The internal water filter (Fig. 1) in the domestic hot water supply (p/n 8716-106-486) has a micron rating of 240 microns.

If a contractor would like to install another filter on the domestic hot water supply prior to the boiler, then it should be rated between 200 and 220 microns.

It is important to be aware that the finer the filter, the possibility of pressure loss through the filter and system is increased.
