Bosch Thermotechnology Adds an Installation Stand for Its Line of Greenstar Boilers

- ▶ New stand provides installation flexibility for floor-mounting the boiler
- ▶ Rugged, sturdy stand has a stylish appliance look to complement the boiler
- ▶ Fits all 8 Greenstar space heating and combi models
- ▶ Same connections and easy access as wall-mounted option

Londonderry, NH – Bosch Thermotechnology has introduced a new installation stand for use with its full line of Greenstar high efficiency gas condensing wall-mounted boilers. Now all 8 Bosch Greenstar space heating and combi-boilers can be installed on the floor when wall-mounting is not convenient or possible.

The new installation stand provides a small footprint with an attractive modern appliance-style appearance with matching boiler color and profile. With its sturdy construction (not just a frame on the floor - the stand employs a floor support bracket that fits snugly into a base holder), the installation stand provides sufficient space for a condensate pump below the boiler unit.

Using the installation stand for floor-mounting a Greenstar boiler offers the same easy service and accessibility of components. Floor-mounted Greenstar boilers have the same connections and accessories as their wall-mounted counterparts. The stand can be pre-piped and brought to the job ready for hookups. No additional training or components are necessary to install a Greenstar boiler on top of the installation stand.

All Bosch Greenstar boilers feature ultra-efficient condensing technology with 95% AFUE rating and new up and out and polypropylene twin pipe venting options for installation flexibility. Affordably priced, every Greenstar model comes with a Bosch 5-year parts and labor limited warranty and may qualify for rebates where available.

About Bosch

About Bosch Thermotechnology

Bosch Thermotechnology is a leading source of high quality cooling and heating systems. The Company offers Bosch tankless, point-of-use and heat pump electric water heaters, Bosch solar thermal systems, Buderus floor-standing and wall-hung boilers, Bosch and FHP geothermal systems as well as controls and accessories for every product line.

Bosch Thermotechnology is committed to reinventing energy efficiency by offering smart products that work together as integrated systems that enhance quality of life in an ultra-efficient and environmentally friendly manner. For more information, visit www.boschheatingandcooling.com

About the Bosch Group

The Bosch Group is a leading global supplier of technology and services. According to preliminary figures, its roughly 281,000 associates generated sales of 46.4 billion euros (\$61.6 billion) in 2013. The Bosch Group comprises Robert Bosch GmbH and its more than 350 subsidiaries and regional companies in some 60 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. Its operations are divided into four business sectors: Automotive Technology, Industrial Technology, Consumer Goods, and Energy and Building Technology. This worldwide development, manufacturing, and sales network is the foundation for further growth. In 2013, Bosch applied for some 5,000 patents worldwide. The Bosch Group's products and services are designed to fascinate, and to improve the quality of life by providing solutions which are both innovative and beneficial. In this way, the company offers technology worldwide that is "Invented for life." Additional information on the global organization is available online at*

www.bosch.com, www.bosch-press.com, and <http://twitter.com/BoschPresse>.

In the U.S., Canada and Mexico, the Bosch Group manufactures and markets automotive original equipment and aftermarket products, industrial drives and control technology, power tools, security and communication systems, packaging technology, thermotechnology, household appliances, healthcare telemedicine and software solutions.
